

I signed up for the "NO CALL" list because I want my privacy and ALL of the calls stopped. Please DO NOT change any part of it. IF I wanted to deal with anyone who I have formerly dealt with, I would call them! I don't want these calls from anyone! Not anyone!

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections! PLEASE! My home life has been helped immensely by this "No Call" list. I have just been through Breast Cancer, Chemo, Radiation, surgeries, etc, and this list has been a life saver! I did not wish to be bothered by anyone. My own children knew I would call them, if I felt up to it. Had this "No call" list not been implemented, I would have had to leave my phone off of the hook. Why? My own safety and health would have been jeopardized without it. My family would have been at the door checking on me, which I did not want! I still want my peace and quiet and they know this! My life has all been for the better since the "No Call" list was implemented. I have been talked into so many things, that I NEVER wanted, just to get these annoying people off of my phone. They never quit! Please don't allow them to intrude on my life. Only twice, after I put my name on the list, but prior to it's effective date, did some one call. I said "I am on the NO CALL list. They apologized and hung up. Thank God! No, Thank the NO CALL LIST! Please don't let it be altered. I'd rather not even have a phone, then to be attacked by these callers, or their machines! This law was one of the best I have ever FELT in Indiana. Please don't alter or lessen it's effect in ANY way. I need it desperately, this way. Please, I am actually begging.
